1. Dev. 93:221-231(2000).
TISSUE SPECIFICITY: EXPRESSED ALMOST EXCLUSIVELY IN THE DEVELOPING
AND MATURE CENTRAL NERVOUS SYSTEM:

AL AND ADDIT BRAIN STRUCTURES INCLUDING THE OLFACTORY BULB

NLAMUS HYPOTHALAMUS, HIPPOCAMPUS AND CEREBELLUM.
CONTAINS I FORMIN HOMOLOGY I (FH1) DOMAIN.
CONTAINS I FORMIN HOMOLOGY S (FH2) DOMAIN.
BELONGS TO THE FORMIN HOMOLOGY FAMILY. CAPPUCCINO

DEVELOPMENTAL STAGE: EXPRESSION BEGINS AT EMBRYONIC DAY 9. 5 1 THE DEVELOPING SPINAL CORD AND BRAIN STRUCTURES AND CONTINUES

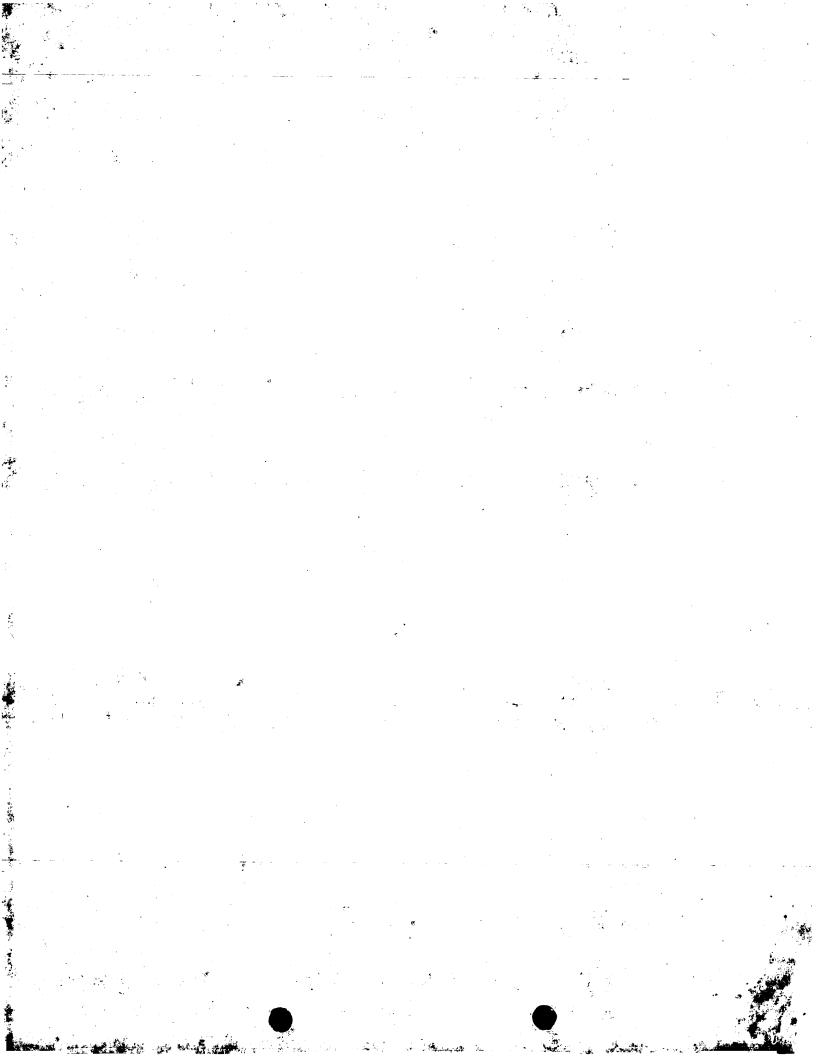

FORMIN

COILED COIL (POTENTIAL)

Dev. 93:221-231(2000).

-I TISSUE SPECIFICITY: EXPRESSED ALMOST EXCLUSIVELY IN THE DEVELOPING AND MATURE CENTRAL NERVOUS SYSTEM.

-I DEVELOPMENTAL STRAGE: EXPRESSION BEGINS AT EMBRYONIC DAY 9. 5 IN THE DEVELOPING SPINAL CORD AND BRAIN STRUCTURES AND CONTINUES IN NEONATAL AND ADUIT BRAIN STRUCTURES INCLUDING THE OLFACTORY BULB, CORTEX, THALAMUS, HYPOTAMPUS, HIPPOCAMPUS AND CEREBELLUM.
-I SIMILARITY: CONTAINS I FORMIN HOMOLOGY 1 (FH1) DOMAIN.
-I SIMILARITY: BELONGS TO THE FORMIN HOMOLOGY 2 (FH2) DOMAIN.

RA NHO-DEPENDENT BANNER TO RECHUT PROFILIN TO THE MEBRANE, WHERE

SUBmitted (AUG-2000) to the EMBL/GenBank/DDBJ databases.

I. FUNCTION: BINDS TO GTP-BOUND FORM OF RHO AND TO PROFILIN. ACTS IN

A RHO-DEPENDENT MANNER TO RECRUIT PROFILIN TO THE MEBRANE, WHERE

IT PROMOTES ACTIN POLYMERIZATION IT IS REQUIRED FOR CYTOKINESIS,

STRUM RESPONSE FACTOR. DER PROTEINS COUPLE RHO AND SRC TYROSINE

STRUM RESPONSE FACTOR. DER PROTEINS COUPLE RHO AND SRC TYROSINE

STRIABEL DURING SIGNALING AND TRANSCRIPTION OF ACTIN DYNAMICS (BY

STRILARITY). IN HEARING TH MAY PLAY A ROLE IN THE REGULATION OF

ACTIN POLYMERIZATION IN HAIR CELLS.

KINDES SPECIFETITY: EXPRESSED IN BRAIN, HEART, PLACENTA, LUNG,

KINDEY, PANCREAS, LIVER, SKELETAL, MUSCLE, AND COCHLEA.

CHOMAIN: DRES ARE REGULATED BY INTRAMOLECULAR GBD-DAD BINDING WHERE

RHO-GET ACTIN DELINATES THE DRES BY DISRUPTING THE GBD-DAD BINDING WHERE

RHO-GET ACTIN DELINATES THE DRES BY DISRUPTING THE GBD-DAD BINDING WHERE
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        This SWISS-PROT entry is copyright. J. Cell Biol. 109:349-3501(1989).
-!-FUNCTION: THE EXTRACELLULAR MATRIX (ECM) OF VOLVOX CONTAINS
INSOLUBLE FIBROUS LAYERS THAT SURROUND INDIVIDUAL CELLS AT A
DISTANCE TO FORM CONTIGUOUS CELLULAR COMPARTMENTS. SSG 185 IS THE
MONOMERIC PRECURSOR OF THIS SUBSTRUCTURE (C32 STRUCTURE). THE
COVALENT CORSS-LINKS ARE FORMED BETWEEN THE SACCHARIDE CHAINS
RATHER THAN BETWEEN THE POLYDEPTIDE CHAINS.
-!- PTM: A CENTRAL DOMAIN OF 77 AA CONSISTS ALMOST EXCLUSIVELY OF
HYDROXYPROLINE RESIDUES.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            224 PNNSPLPP-----SPOPTASS-----RPPSPPP----SPRPPSPPSPS- 259

Proc. Natl. Acad. Sci. U.S.A. 90:5554-5558(1993).

1. Proc. Natl. Acad. Sci. U.S.A. 90:5554-5558(1993).

2. I. FUNCTION: IS IMPORTANT FOR THE MORPHOGENESIS OF LIMB AND KIDNEY AND MAY HAVE BY FUNCTION IN DIFFERENTIATED CELLS OR MAY BE INVOLVED IN MAINTAINING SPECIFIC DIFFERENTIATED STATES.

2. SUBCELLULAR LOCATION: NUCLEAR.

3. SUBCELLULAR LOCATION: NUCLEAR.

4. VARIATION HARDOUTS: AT LEAST 5 ISOFORMS; IA (SHOWN HERE), IB, II, III AND IV (AC Q05659); ARE PRODUCED BY ALTERNATIVE SPLICING. A VARIATION IN SPLICING SEEN AMONG DIFFERENT TISSUES AND DIFFERENT SIZES TRANSCRIETS EXIST WITHIN ANY ONE TISSUE.

2. I. TISSUE SPECIFICITY: IT IS PRESENT IN THE ADULT KIDNEY, TESTIS, LIMB, OVARY, BRAIN: SMALL INFESTINE, SALIVARY GLAND AND HARDERIAN GLAND.

3. IL SEXPRESSED IN THE APICAL ECTODENAAL RIDGE AND THE MESENHYMAL COMPARTMENT. IN THE POSTERIOR ECTON. DURING KIDNEY MORPHOGENESIS, EXPRESSION IS INITIALLY RESTRICTED TO THE EPITHELIAL COMPARTMENT OF THE PRONEPHROS.

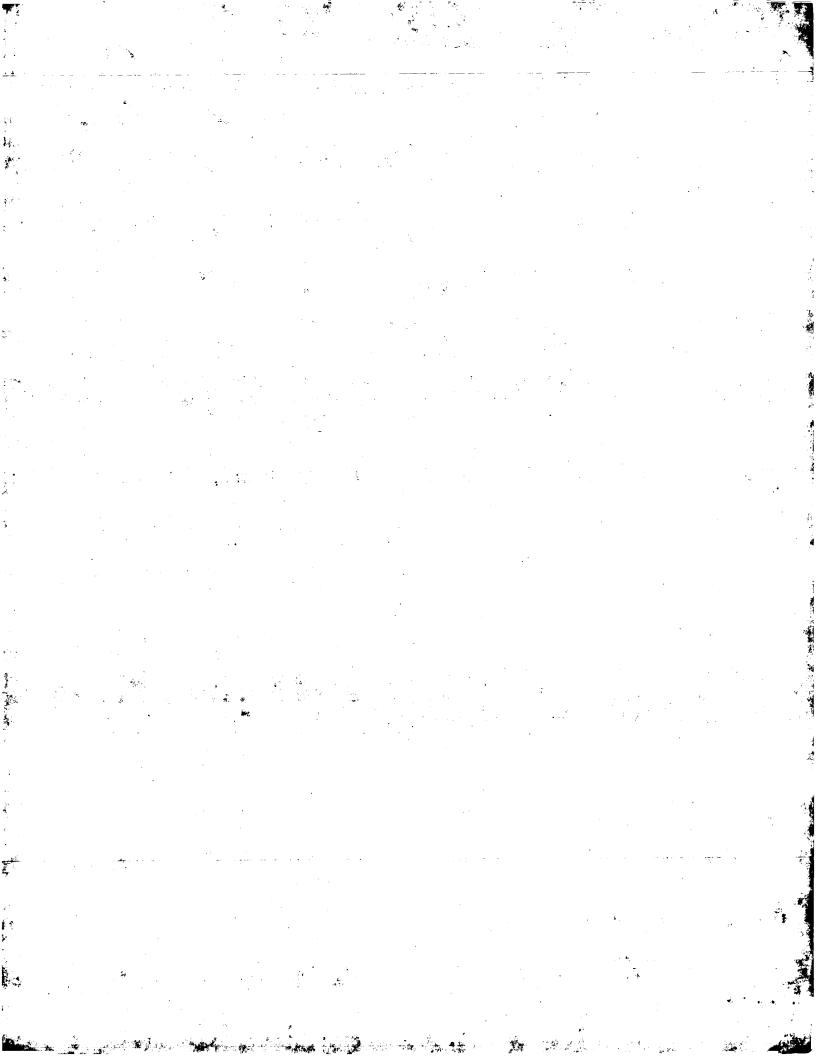

3. THE EPITHELIAL COMPARTMENT OF THE PRONEPHROS AND MESONEPHROS.

4. SIMILARITY: CONTAINS I FORMIN HOMOLOGY 2 (FH1) DOMAIN.

5. SIMILARITY: BELONGS TO THE FORMIN HOMOLOGY 2 FAMILY. CAPPUCCINO

Submitted (APR-1998) to the EMBL/GenBank/DDBJ databases.
-!- FUNCTION: CYTOKINE THAT BINDS TO FAS ANTIGEN, A RECEPTOR THAT
TRANSDUCES THE APOPTOTIC SIGNAL INTO CELLS. MAY BE INVOLVED IN
CYTOTOXIC T CELL MEDIATED APOPTOSIS AND IN T CELL DEVELOPMENT.
FAS-ANTIGEN MEDIATED APOPTOSIS MAY HAVE A ROLE IN THE INDUCTION OF
PERIPHERAL TOLERANCE, IN THE ANTIGEN-STIMULATED SUICIDE OF MATURE
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Gaps

                                                                                                              Sazuka T., Tomooka Y., Kathju S., Ikawa Y., Noda M., Kumar S.;
"Identification of a developmentally regulated gene in the mouse
central nervous system which encodes a novel proline rich protein.",
elochim. Blophys. Acta 1132:240-248(1992).
-!- FUNCTION: MAY PLAY AN IMPORTANT BIOLOGICAL ROLE IN THE
DEVELOPMENT AND DIFFERENTIATION OF THE CENTRAL NERVOUS SYSTEM.
-!- TISSUE SPECIFICITY: IN THE HEART AND TESTIS AND LESS SO IN THE
LUNG, SKELETAL MUSCLE, KIDNEY, PANCREAS AND BRAIN.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Nomura N., Miyajima N., Sazuka T., Tanaka A., Kawarabayasi Y., Sato S., Nagase T., Seki N., Ishikawa K. I., Tabata S., Prediction of the coding sequences of unidentified human genes I. The coding sequences of 40 new genes (KIAA0001-KIAA0040) deduced by analysis of randomly sampled cDNA clones from human immature myeloid
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi;

NUCLEIC ACIGS Res. 16:11383-11383(1988).

-! FUNCTION: ACTS AS A TUMOR SUPPRESSOR IN MANY TUMOR TYPES. INDUCES GROWTH ARREST OR APOPTOSIS DEPENDING ON THE PHYSIOLOGICAL CIRCUMSTANCES OR CELL TYPE, BUT BOTH ACTTVITIES ARE INVOLVED IN TUMOR SUPPRESSION. ACTS IN CELL CYCLE REGULATION, IS A TRANSACTIVATOR THAT ACTS TO NEGATIVELY REGULATE CELL DIVISION BY CONTROLLING A SET OF GENES REQUIRED FOR THIS PROCESS. ONE OF THE ACTIVATED GENES IS AN INHIBITOR OF CYCLIN-DEPENDENT KINASES. APOPTOSIS INDUCTION SEEMS TO BE MEDIATED BITHER BY STIMULATION OF BAX AND FAS ANTIGEN EXPRESSION, OR BY REPRESSION OF BCL-2 Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Archosauria; Aves; Neognathae; Galliformes; Phasianidae; Phasianinae; "Nucleotide sequence of a cDNA encoding the chicken p53 nuclear 01-MAR-1989 (Rel. 10, Created)
